

MIKKEL DAMM VIND

Senior full-stack developer, 18+ years in.
Frontend roots, full-stack reach — from
booking platforms at scale to SaaS
products and climate-tech tooling.

PROFILE

Equally at home in database design, queues and calculation engines as in interface craft and product design. Strongest on the bigger picture: systems, architecture, and how the pieces fit together.

I've built products end to end as a solo developer, led teams of up to 8 across borders, co-founded and served as CTO of a startup, and shipped features used daily by thousands of users.

A lot of how I build today is agentic: AI coding agents and tight feedback loops for speed, while staying the person who understands and owns every line that ships.

Målbar
Part-time

Lead Software Developer

JUN 2023 – CURRENT

Danish sustainability platform helping companies measure and reduce environmental impact through life cycle assessment (LCA).

- Built the core web tool end to end — database, backend, frontend, queues and the result calculation engine.
- Translated a complex Excel-based screening tool into a full web application anyone can use.
- Built the admin platform where the team manages the materials, processes and datasets behind the calculations.

Coding Moon ApS
Fulltime

Software Developer & Owner

OCT 2018 – CURRENT

One-person software studio taking web and mobile products from rough sketch to launch, for clients and as own products.

- Client work: big.dk and internal tools for Bjarke Ingels Group, bookkeeping automation for Zignifikant, CRM integrations for Spilbræt.
- Own products: Ønsker.dk, Instabolig and Subgent, plus Vejtilleg nearing launch.
- Full ownership of design, architecture, delivery and client relationships — no hand-offs.

SKILLS

Languages & core

TypeScript, JavaScript, HTML, CSS, Node.js, C# / .NET, SQL

Frontend

React, Next.js, Angular, React Native, Expo, frontend architecture

Backend & data

Node.js, PostgreSQL, MySQL, REST API's, queues & background jobs, calculation engines, Docker

Product & architecture

System architecture, data modelling, end-to-end product ownership, UX and product design, sketch to launch

Quality & process

Automated testing, clean code advocacy, code review, Scrum and agile facilitation, technical leadership and mentoring

Ways of working

Agentic development with AI coding agents, solo end-to-end delivery, direct client collaboration

eManager
Fulltime

Founder & CTO

DEC 2018 – OCT 2021

eSport manager game built for real Counter-Strike events.

- Co-founded an esports startup and built the platform from scratch as CTO.
- Manager game running on live Counter-Strike events — real players, matches and tournaments.
- Grew the team to 5 people and raised 1M DKK in capital.

EDUCATION

Frederiksberg HTX

Higher Technical Examination (HTX), Information Technology
2006 – 2009

CERTIFICATIONS

Certified Agile Tester (CAT)

iSQL GmbH · Jan 2014

ISTQB Software Tester Foundation

ISTQB / DELTA · Oct 2011

LANGUAGES

Danish — native

English — fluent, professional
working proficiency

INDUSTRIES

Sustainability & climate tech (LCA)

Fintech & accounting software

Transport, travel & logistics

Architecture & design

Esports & gaming

E-commerce & bookkeeping
automation

Consumer web & mobile apps

SaaS & digital agency / CMS

Dinero
Fulltime

Senior Frontend Developer

SEP 2016 – OCT 2019

One of Denmark's leading cloud-based accounting platforms for small businesses.

- Took the product from a legacy Backbone codebase to a full Angular SPA, alongside a broad UX overhaul.
- Owned and shipped kassekladde and bankafstemning — core features used daily by thousands of users.
- Built Node.js services on Docker and migrated the test suite from Selenium to Cypress.

DFDS
Fulltime

Frontend Developer

FEB 2015 – SEP 2016

Ferry and logistics network in and around Europe.

- Brought modern frontend thinking into an organisation of 80+ mostly C# backend developers.
- Led a rebuild of dfds.com, from SharePoint with Angular modules to a headless CMS with React.
- Rewrote parts of the passenger booking platform from .NET MVC to a full Angular SPA.

Group Online A/S
Fulltime

Full-Stack Developer → Lead Developer

FEB 2008 – JAN 2015

First large web agency with 20,000+ customers.

- Built a new CMS from scratch in .NET with a colleague; it became the company's main product and was later sold.
- Grew into a lead developer role heading a team of 8 across Denmark and Ukraine.
- Focused on architecture and frontend, establishing testing procedures and introducing Scrum.
